

"Alert Level 1 to 5" will be issued at the time of Heavy Rains or Typhoons!

- "Evacuation" means to "avoid difficulties", in other words, to "ensure safety". If you are at a safe place, you do not have to evacuate.
- If the Alert Level 3 is issued, the elderly at dangerous places must evacuate and if the Alert Level 4 is issued, all of those at dangerous places must evacuate.
- Please check the hazard map and confirm whether or not the place you live in is a potentially high-risk location.

Alert Level		Who will issue the alerts when?	What should we do?	Pictogram	
Alert Level 5	Emergency Safety Assurance	Beppu City	When a disaster has just occurred or there is a high possibility that a disaster is occurring within Beppu City. Note: This is the info. when the City manages to release after obtaining the info. of disaster occurrence, not the info. that will be always provided.	Immediately secure your personal safety because your life is in danger. Note: If you find it difficult to evacuate outside, try to move to a safe place nearby or a safer place at home.	
Alert Level 4	Evacuation Order		When the threat of disaster is high	All people who are at dangerous places must evacuate immediately.	
Alert Level 3	Evacuation of the Elderly and others		When a warning is issued or when the elderly and others need to start the evacuation	Those at dangerous places and have difficulty escaping quickly should evacuate.	
Alert Level 2 Heavy rain, flood, and storm surge warnings		JMA	When a warning is issued	Check the location of the evacuation center, the emergency kit, and stockpile.	
Alert Level 1 Early Warning Information		JMA	When a warning is likely to be issued	Be prepared for the disaster and check the latest info.	

~Protect your life by yourself! Please try to decide when to evacuate by yourself by utilising the Alert Information~
